Product highlights

5 flexible outlets

Five outlets on separate cords that are all adapter spaced accommodate multiple devices without crowding.

15 amp circuit breaker

Safeguards against overburdening the surge protector by sensing when the connected equipment is drawing more electricity than the surge protector can handle. It then disconnects from the power, guarding against electrical fires.

Master on/off switch

This master switch controls power to the outlets on the surge protector.

Power indicator light

This LED alert lights up to indicate that the surge protector is drawing power from the AC outlet.
